

Bushmaster Barrels & Barrel Parts...

Individual Delta Ring Parts...

- All new, highest quality, Made in USA parts...
- A. Aluminum Delta Ring... (8448712) \$7.50
 - B. Handguard Weld Spring... (8448555) \$5.25
 - C. Handguard Snap Ring... (MS16626-1137) \$2.75
 - D. Gas Tube Roll Pin... (MS16562-106) \$.50

Delta Ring Kit... Includes Aluminum Delta Ring, Handguard Weld Spring, Snap Ring and Gas Tube Pin (all parts as shown at left). (8448712K) **\$13.95**

Individual Barrel Parts...

- A. Front Sling Swivel... (8448571) \$3.50
- B. Front Sling Swivel Rivet... (8448571) \$.80
- C. Barrel Extension... (9349054BE) \$15.95
- D. Barrel Nut... (9349054BN) \$12.95

COMPENSATORS / FLASH SUPPRESSORS / MUZZLE BRAKES...

Bushmaster "Izzy" Flash Suppressor/Compensator... One of a series designed by a Bushmaster employee - features 3 gas ports, a machine turned ribbed design, and a closed bottom. It is bored to function as a Flash Suppressor, but also effectively controls muzzle rise in rapid fire. Machined from quality gunsteel - manganese phosphate finished - 2 3/16" overall length - threaded 1/2" x 28 T.p.i. (threads per inch) for 5.56mm/.223 Rem. caliber barrels. Install using a 3/4" open end wrench and a crush washer or peel washer. (IZ-102660-FH) **\$36.95**

IZ-102660-FH

Bushmaster "Izzy" Flash Suppressor/Compensator... for plain muzzle 5.56mm/.223 cal. "Post-Ban" guns. Similar to above but slips over .700" diam. muzzles and is pinned on with a taper pin and high strength Loctite® for extra safety. **Warning:** Requires factory installation, or professional gunsmithing, to drill and install the taper pin. (IZ-102660-FH) **\$36.95**

For Threaded Muzzles... 2 3/16" Length

Bushmaster Izzy Muzzle Brake... A 5.56mm/.223 Cal. Muzzle Brake - production approved by the BATF - featuring four gas ports and a ribbed design to improve cooling. Machined of 4140 gun steel with a manganese phosphate finish - very effective in controlling muzzle rise. Slip-on/taper pinned version for barrels with plain crowned muzzles, and threaded model (shown left - threaded 1/2" x 28 T.p.i.) can be installed without regard to port location (timing) and will still be effective, however most are installed with ports positioned 12 - 3 - 6 - 9 o'clock. The slip-on, pinned version requires factory installation or professional gunsmithing to drill and install the taper pin, and for extra safety, high strength Loctite® should be used in addition to the taper pin.

For Plain Crowned Muzzles 2 5/8" Length

- **Threaded Izzy Brake...** for 1/2" x 28 T.p.i. threaded barrels - requires lock washer... (IZ-102660-PRBF) **\$36.95**
- **Slip-on Izzy Brake...** for plain muzzles .700" diameter - requires gunsmithing... (IZ-102660-PSTF) **\$36.95**
- **.308 Izzy Brake...** for .308 Cal. threaded barrels (5/8" x 24) - requires crush washer... (IZ-308-PRBFH) **\$36.95**

Phantom 2 Flash Suppressor... An improved version of the Phantom - no bottom slot - avoids a dust signature when firing prone. Superior flash hiding in all conditions. For standard muzzles (1/2" x 28 T.p.i.), machined from quality gun steel with a final phosphate coating to mil. specs. Overall Length is 2 3/16" - flats allow installation with a 3/4" wrench.

Note: Crush Washer or Peel Washer is required for correct timing - see below. (YHM-28-5C1) **\$36.95**

Phantom Flash Suppressor... Precision CNC machined from quality gun steel - phosphate coated to military standards - with 5 equally spaced gas slots, it eliminates most of the flash and offers excellent performance with night vision equipment. Superior strength to earlier forked type, and it won't hang up on brush or clothing. 2 3/16" Overall - for threaded muzzles only (1/2" x 28 T.p.i.). Requires no specific timing, so no Crush, Peel or Lock Washer is needed. (YHM-29) **\$36.95**

A2 Bird Cage Flash Suppressor... Five Slot Design (threaded 1/2" x 28 T.p.i.) without a bottom slot to avoid dust signature when shooting prone position. Peel Washer or Crush Washer is required for correct installation timing. **Note:** Even if pinned on/welded over, this Suppressor is NOT long enough to make a 14.5" barrel legal for use on a semi-auto rifle. (9349051) **\$6.50**

1 3/4" overall length

A1 Bird Cage Flash Suppressor... Original "Birdcage" from the Viet Nam era - has six equally spaced slots all around - needs no specific slot timing. Standard 1/2" x 28 T.p.i. threading. For installation use the Flash Hider Lock Washer (below). (8448576) **\$6.50**

Installation Washers... For timing of Muzzle Brakes, Flash Suppressors and Compensators...

A2 "Crush" Washer... Used at Bushmaster factory for positioning suppressor and muzzle brake installations - for one time use only. It must be replaced after removal. (12991533B) **\$2.95**

A2 Peel Washer... A re-usable multi-layer washer for the correct timing of suppressor or brake installations on threaded muzzle barrels. (9349052) **\$3.15**

A1 Flash Hider Lock Washer... (8448577) **.60¢**

MUZZLE BRAKES / COMPENSATORS / FLASH SUPPRESSORS...

Russian Design AK74 Type Muzzle Brake... A 5.56/.223 caliber copy of the very effective Russian Military brake found standard on the AK74 Rifle. Screws onto threaded muzzle barrels and locks in place with an Allen head set screw (Note: a peel washer or crush washer is required for correct timing during installation). 3" overall length. Muzzle climb is controlled by three upper gas ports - recoil is diminished by four 45° ports directing gas at an angle from the weapon, and a contoured flat at the end of the brake directs gas sideways. The "Post-Ban" model slips over non-threaded muzzles (.700" diam.) and pins in place (taper pin included).

For Threaded Muzzles...

(MMT-0012A) **\$27.95**

Fits standard threaded barrels - 1/2" x 28 T.p.i.

"Post-Ban" Model for Non-Threaded Muzzles

(MMT-0012PB) **\$27.95** Requires taper pin drilling / pinning. Bushmaster factory installation is recommended.

5.5" AK74 Muzzle Brake for 5.56mm/.223

Carbines... (MMT-0013) **\$31.95** A very functional muzzle brake for the short barreled carbine - 5.5" overall length, when permanently installed on the 11.5" barrel, makes a legal 16" barrel length. A Peel Washer is included for "timing" (positioning of brake on muzzle). Threaded to fit standard muzzles (1/2" x 28 T.p.i.)

"CAR 15" Flash Suppressors... High quality, manufactured in the U.S.A. - the six slot design makes these suppressors very effective on the short barreled carbine.

For threaded muzzles only (threaded 1/2" x 28 T.p.i.).

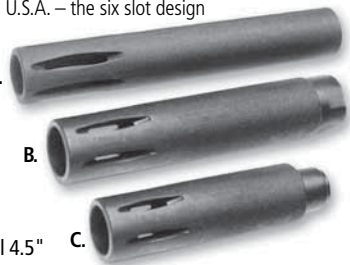

A. CAR 15 Extended Flash Suppressor... 5.5" overall length - threaded for all Pre-Ban barrels (MMT-500) **\$15.95**

B. Shorty Look Slip-over Flash Suppressor... Internal threads allow a "slip-over" installation onto the barrel - giving you gun a "shorty" look without sacrificing accuracy - 5" overall length

For Std. Diameter Barrels (.610" at muzzle)... (MMT-0019) \$15.95

For Heavy Diameter Barrels (.720" at muzzle)... (9349SFSH) \$20.95

C. CAR 15 "Original" Flash Suppressor... This is the original 4.5" M177 carbine design... (1005-914-3902) **\$15.95**

Y COMP Muzzle Brake... (YHM-258) \$48.95 or Mini Y COMP... (YHM-259) \$31.95 for Threaded Muzzle Barrels...

These 5.56mm/.223 compensators are threaded to fit "Pre-Ban" AR barrels. The Y Comp overall length is 3 1/4" - the Mini Y Comp is 2 5/16" overall length. These brakes will fit barrels with muzzles threaded 1/2" x 28 T.p.i. (threads per inch). Order either a Crush Washer or Peel Washer for installation.

Y COMP Muzzle Brake... (YHM-258P) \$48.95 or Mini-Y COMP Muzzle Brake... (YHM-259P) \$31.95 for "POST-BAN" Rifles...

These effective compensators for 5.56mm/.223 AR type rifles are CNC machined from quality gun steel - with manganese phosphate final finish. They slip over Post-Ban muzzles and are held in place with a steel taper pin (drilling for taper pin is required for installation).

Angled ports on each side deflect gases, upper ports control muzzle rise. Mini Y Comp adds 1 3/4" additional length to the Post-Ban barrel - Y Comp adds 2 5/8". **Note:** Bushmaster will only warranty factory installations of these muzzle brakes - no installation charge if purchased from Bushmaster.

Threaded Muzzle Brake / Flash Suppressor Adaptor for Bushmaster Carbon 15 Models...

(AZ15133) **\$26.50** This Collar Adaptor allows installation of standard flash suppressors and compensators on original design Carbon 15 barrels by threading onto the collar, and installing on the muzzle in the usual manner. Machined from high quality steel and aluminum; matte black finished; threaded 1/2" x 28 T.p.i. pitch for standard .223 / 5.56 suppressors/compensators. **Note:** Depending on the type of "timed" suppressor or compensator you want to install, you may need to order a Crush Washer (Part# 12991533B - **\$2.95**) or a Peel Washer (Part# 9349052 - **\$3.15**).

Shoot-Away Muzzle Cap... Gov't. Issue Type Blank Firing Adapters... (RAY-008) \$15.95

(RCL-10) **.45¢ ea.** Red plastic muzzle cap designed to slip over AR15/M16 Barrels to keep out dirt and moisture. Thin plastic can be shot through safely if necessary.

Allows the AR15 type gas system to function with blank ammo. Made of heavy steel with a finish of bright red paint for safety - fits over A2 birdcage flash suppressor on 16" & 20" Bbls. For 11.5" & 14.5" Bbls., order yellow finished model... (RAY-0010) **\$15.95**

Warning! Remove these adapters BEFORE Firing Live Ammo!
